

## Analyzing Course Material Expenses by Field of Study

The objective of this survey was to gain a clearer understanding of the cost of required course materials for students. Participants were asked to answer the following question: 'On average, how much do you currently spend on all of your required course materials in a single semester?' The graph below presents the responses from undergraduate students.

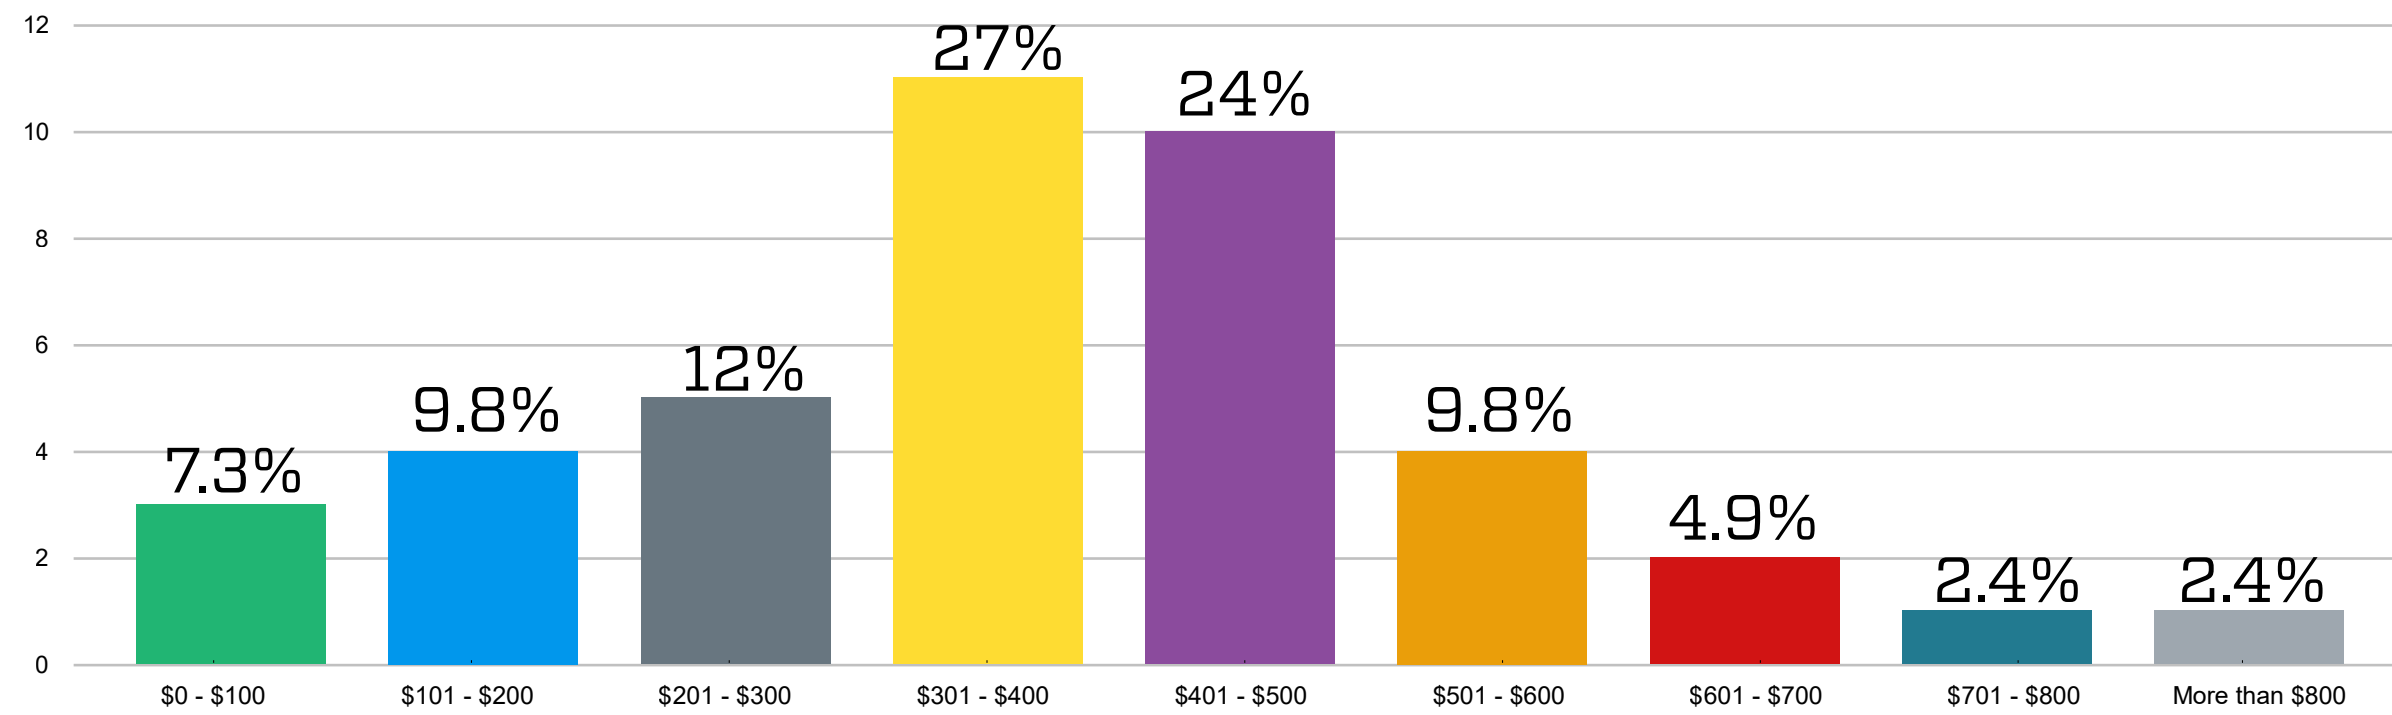

The responses were gathered from a diverse group of students across various disciplines. To deepen our analysis, we chose to examine the data by field of study to better understand how course material costs vary across different academic areas. The following three pages will present the survey results, broken down by undergraduate students and their respective fields of study.

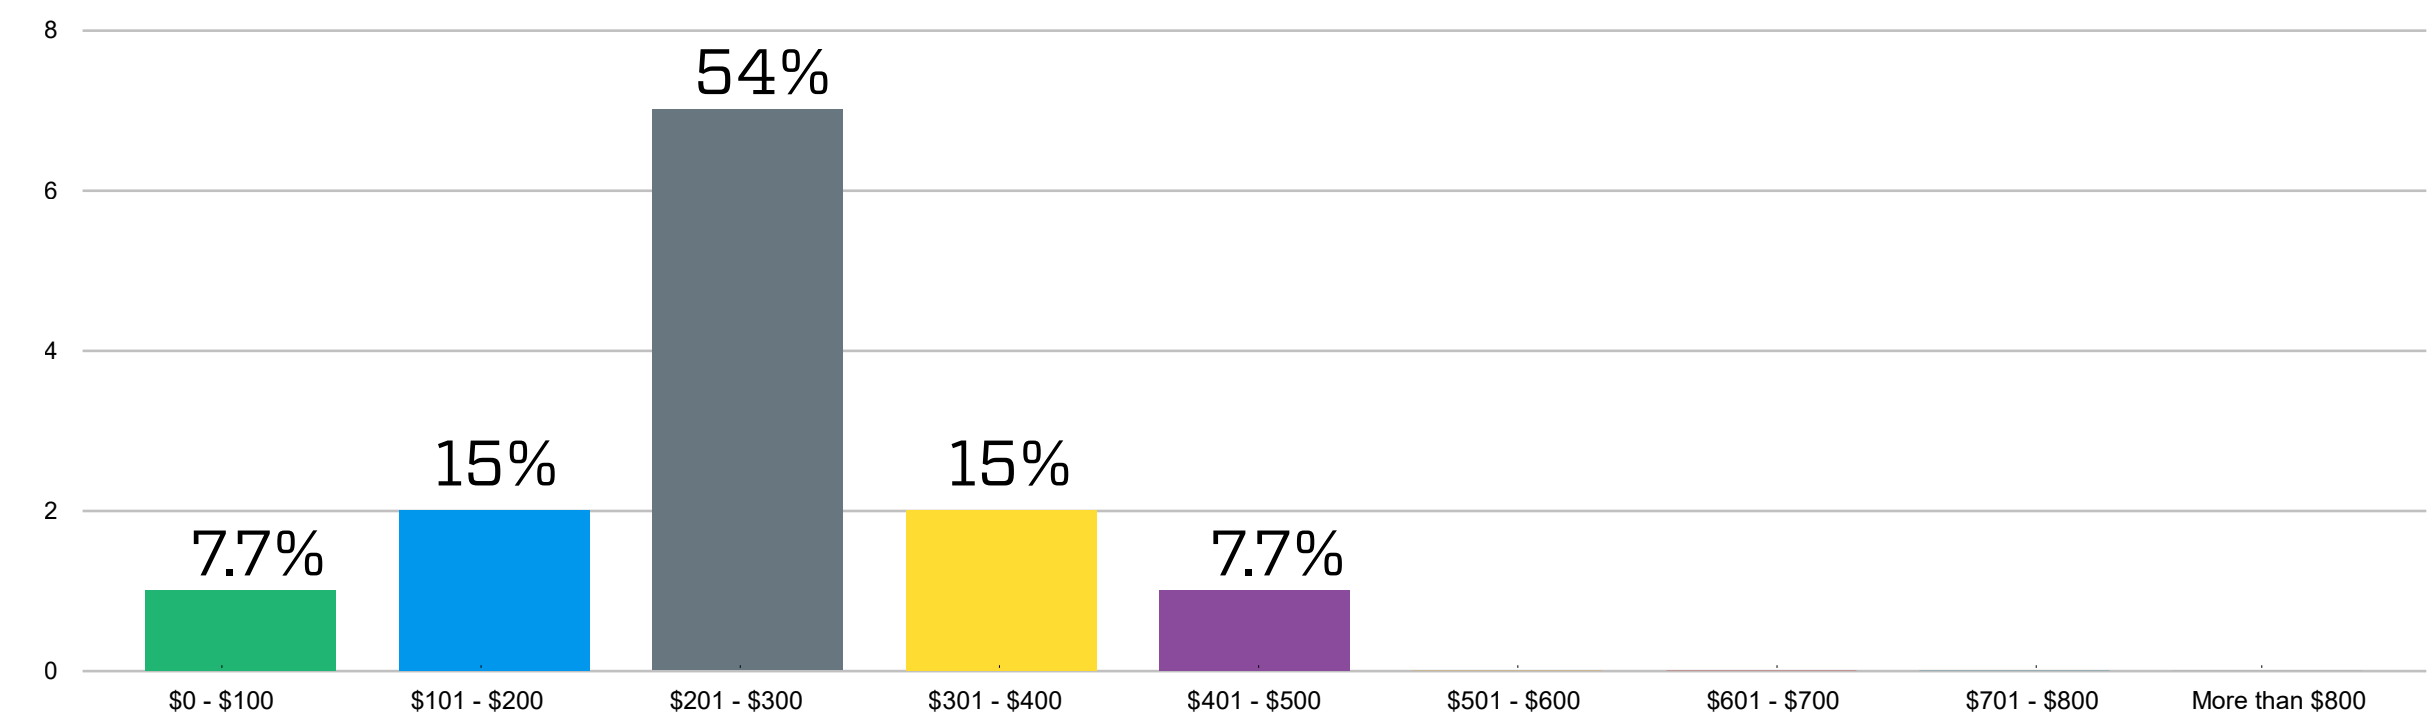

# ANALYSIS BY FIELD OF STUDY

On average, how much do you currently spend on all of your required course materials in a single semester?

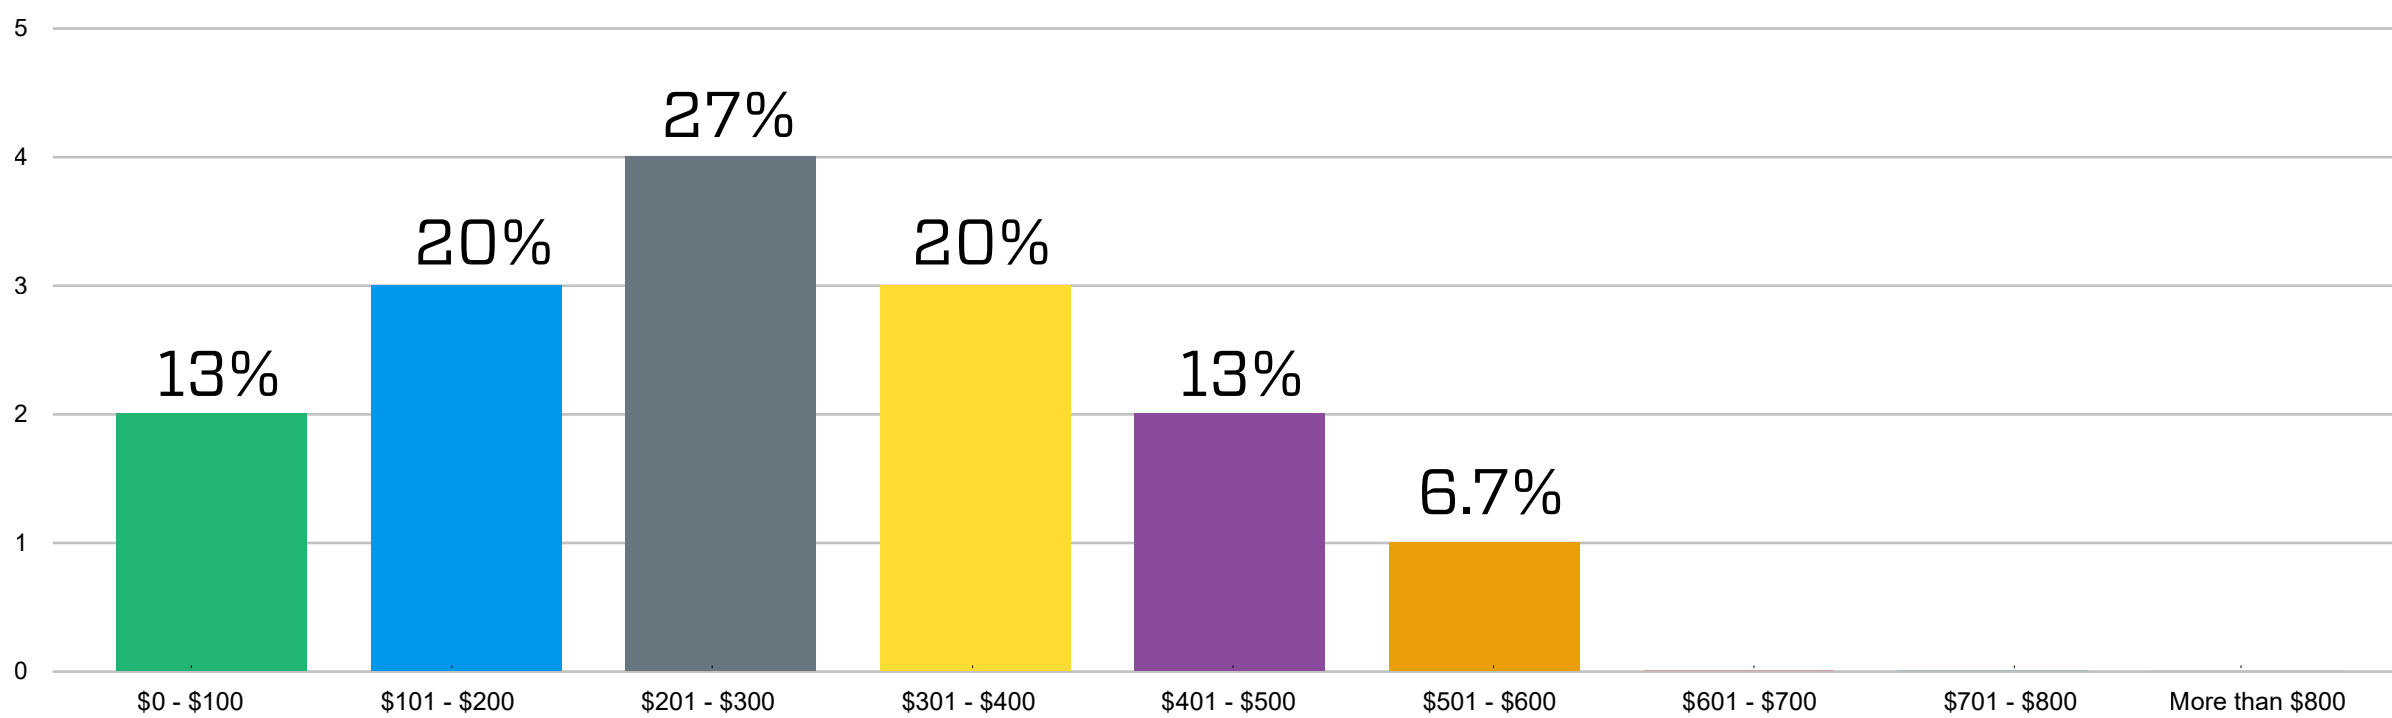

Below are the amounts spent by undergraduate students on required course materials per semester, categorized by field of study.

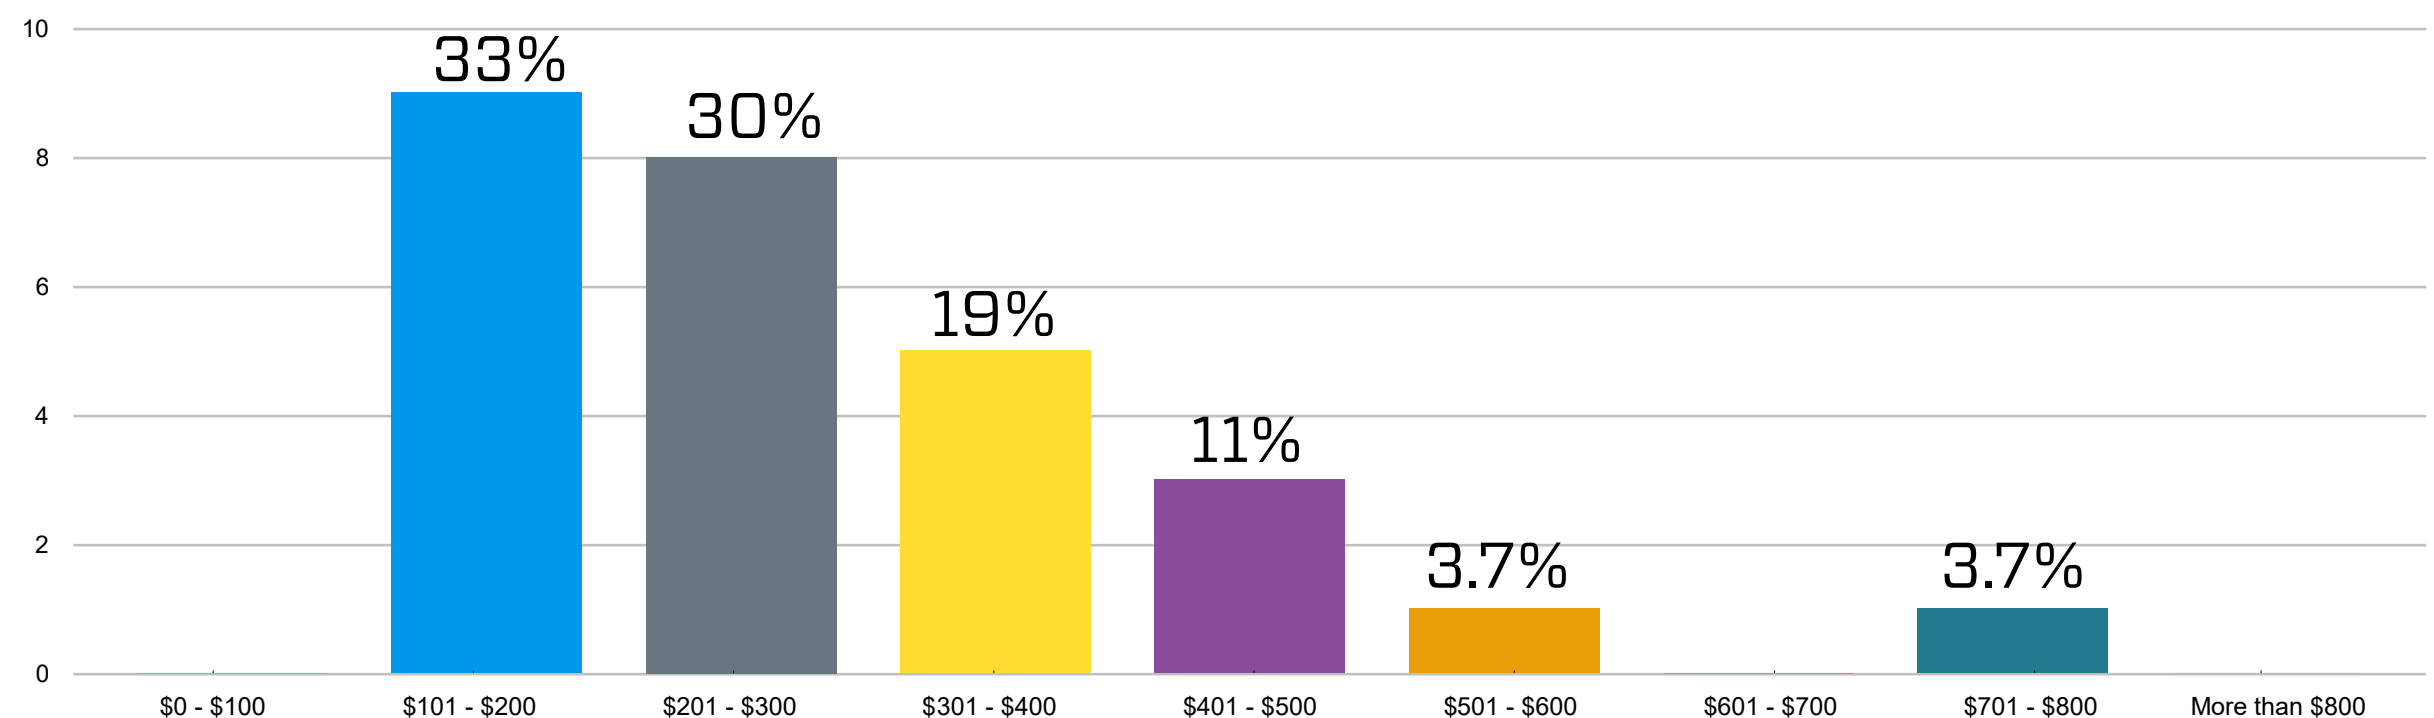

Field of study: Business-Related (Marketing, Accounting, etc.)

Field of study: Computer Science

Field of study: Communications, Journalism

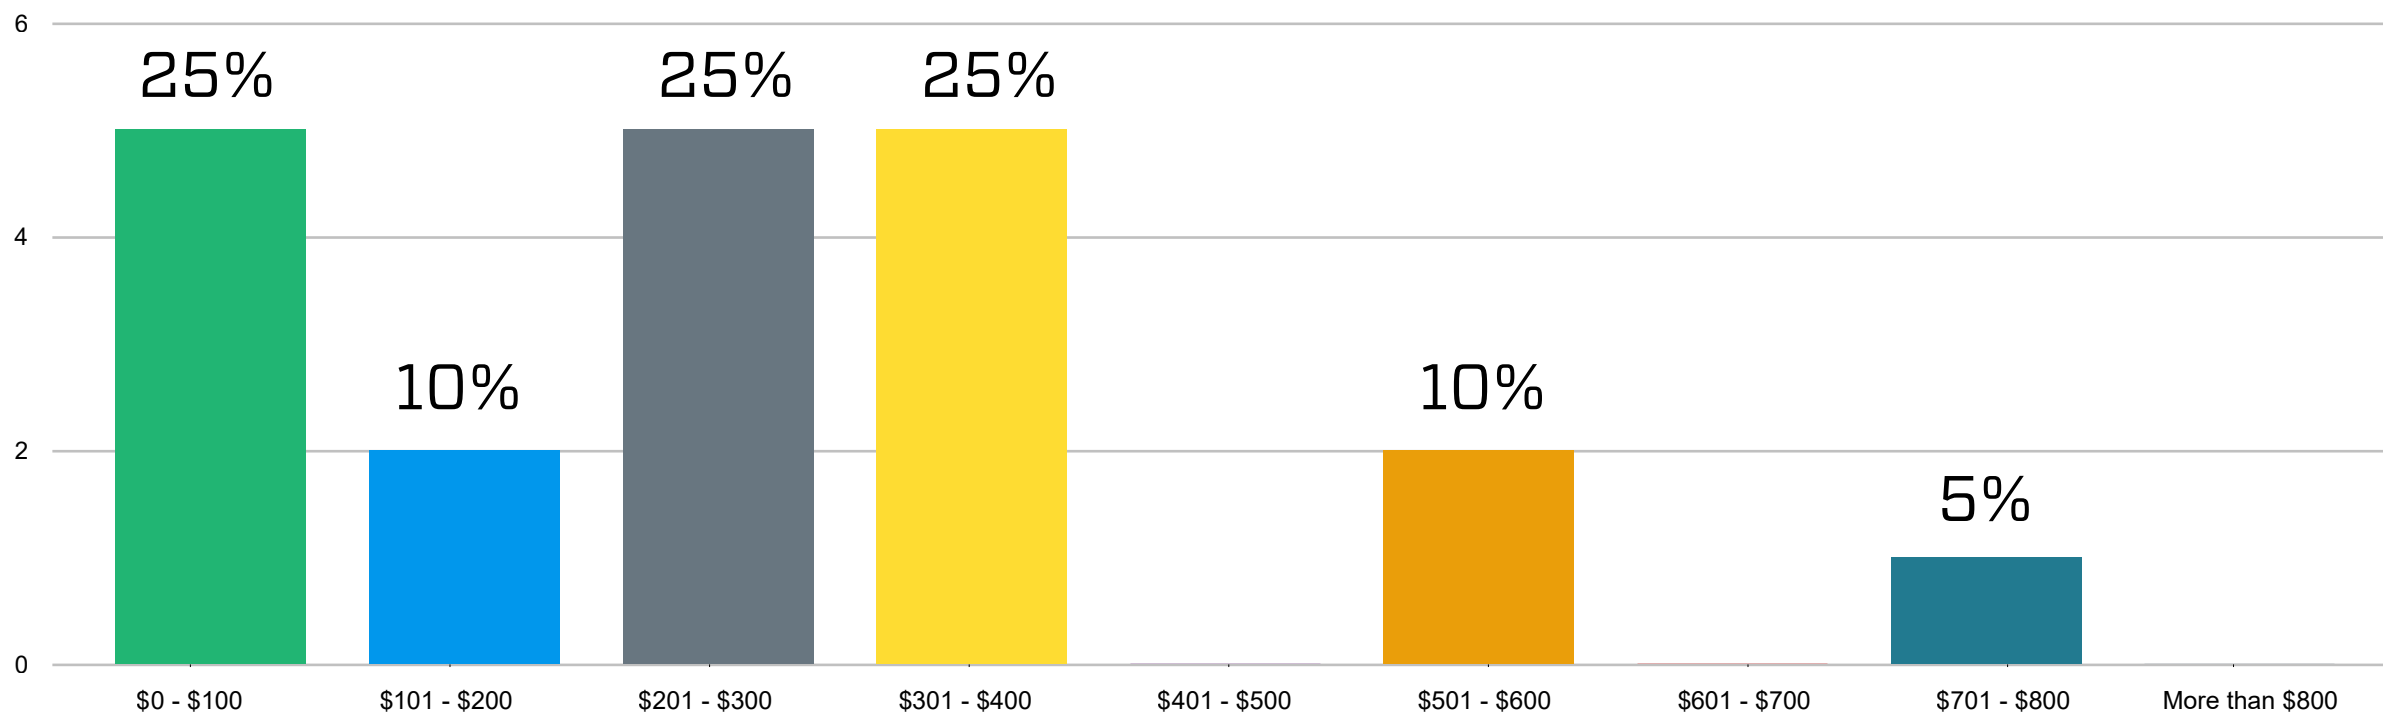

Field of study: Education

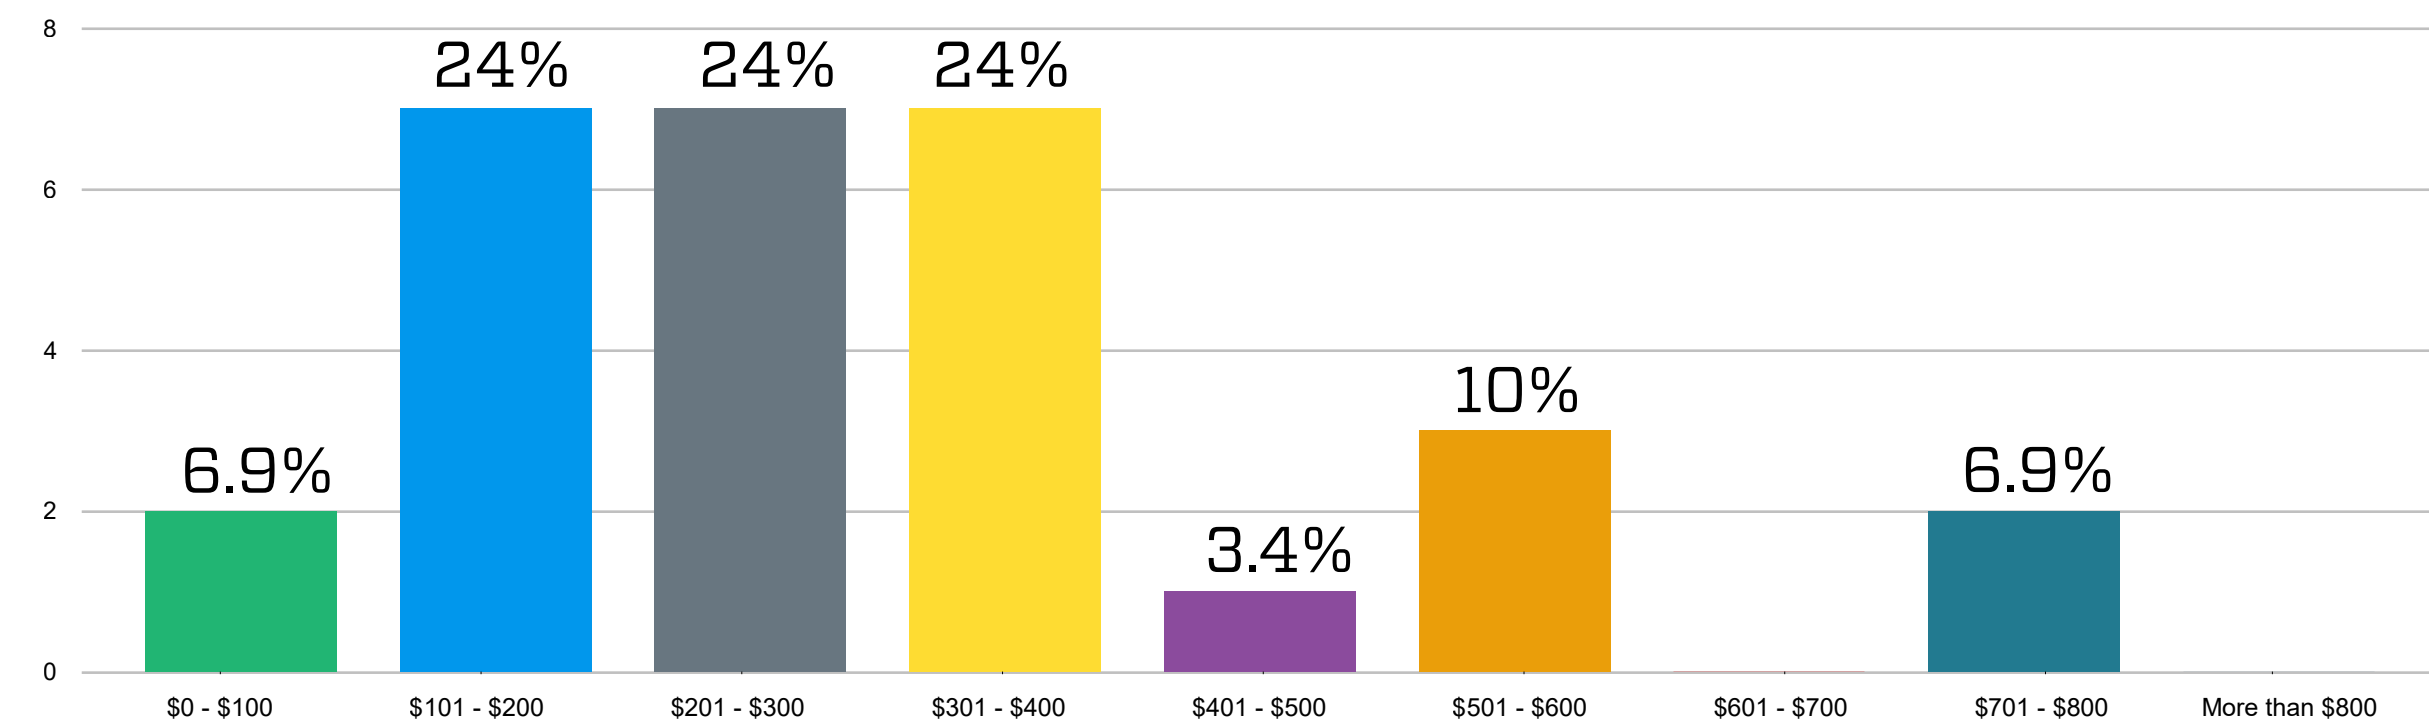

# ANALYSIS BY FIELD OF STUDY

On average, how much do you currently spend on all of your required course materials in a single semester?

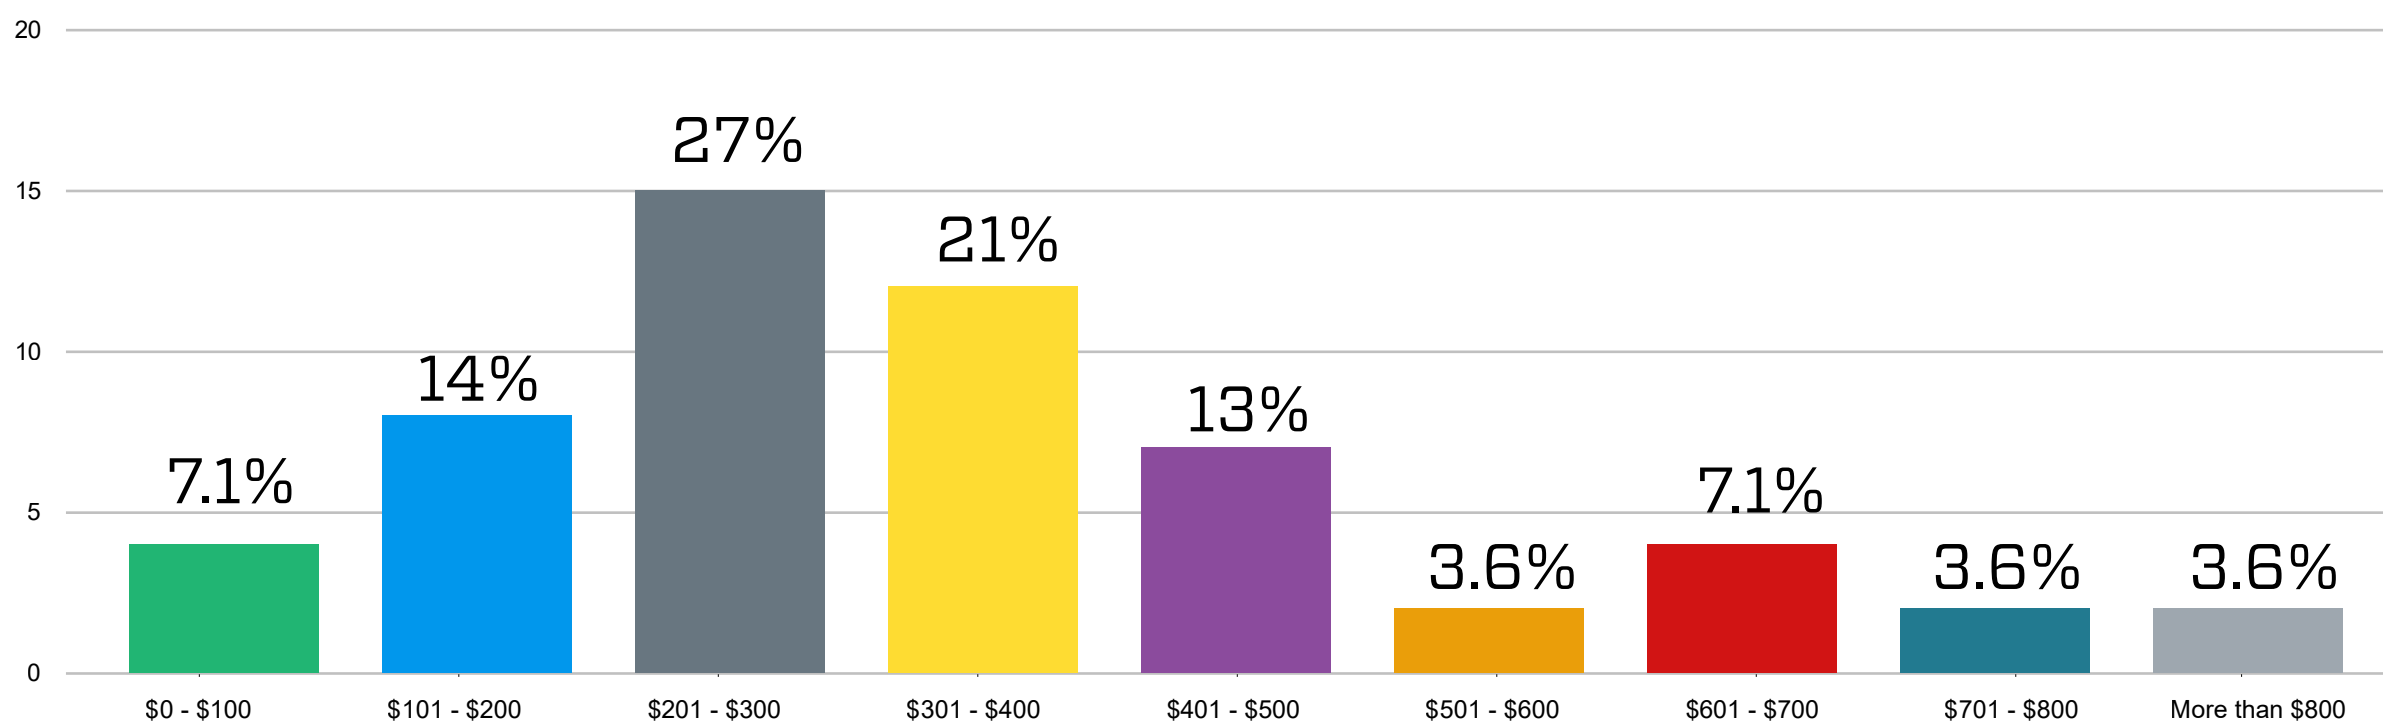

*Below are the amounts spent by undergraduate students on required course materials per semester, categorized by field of study.*

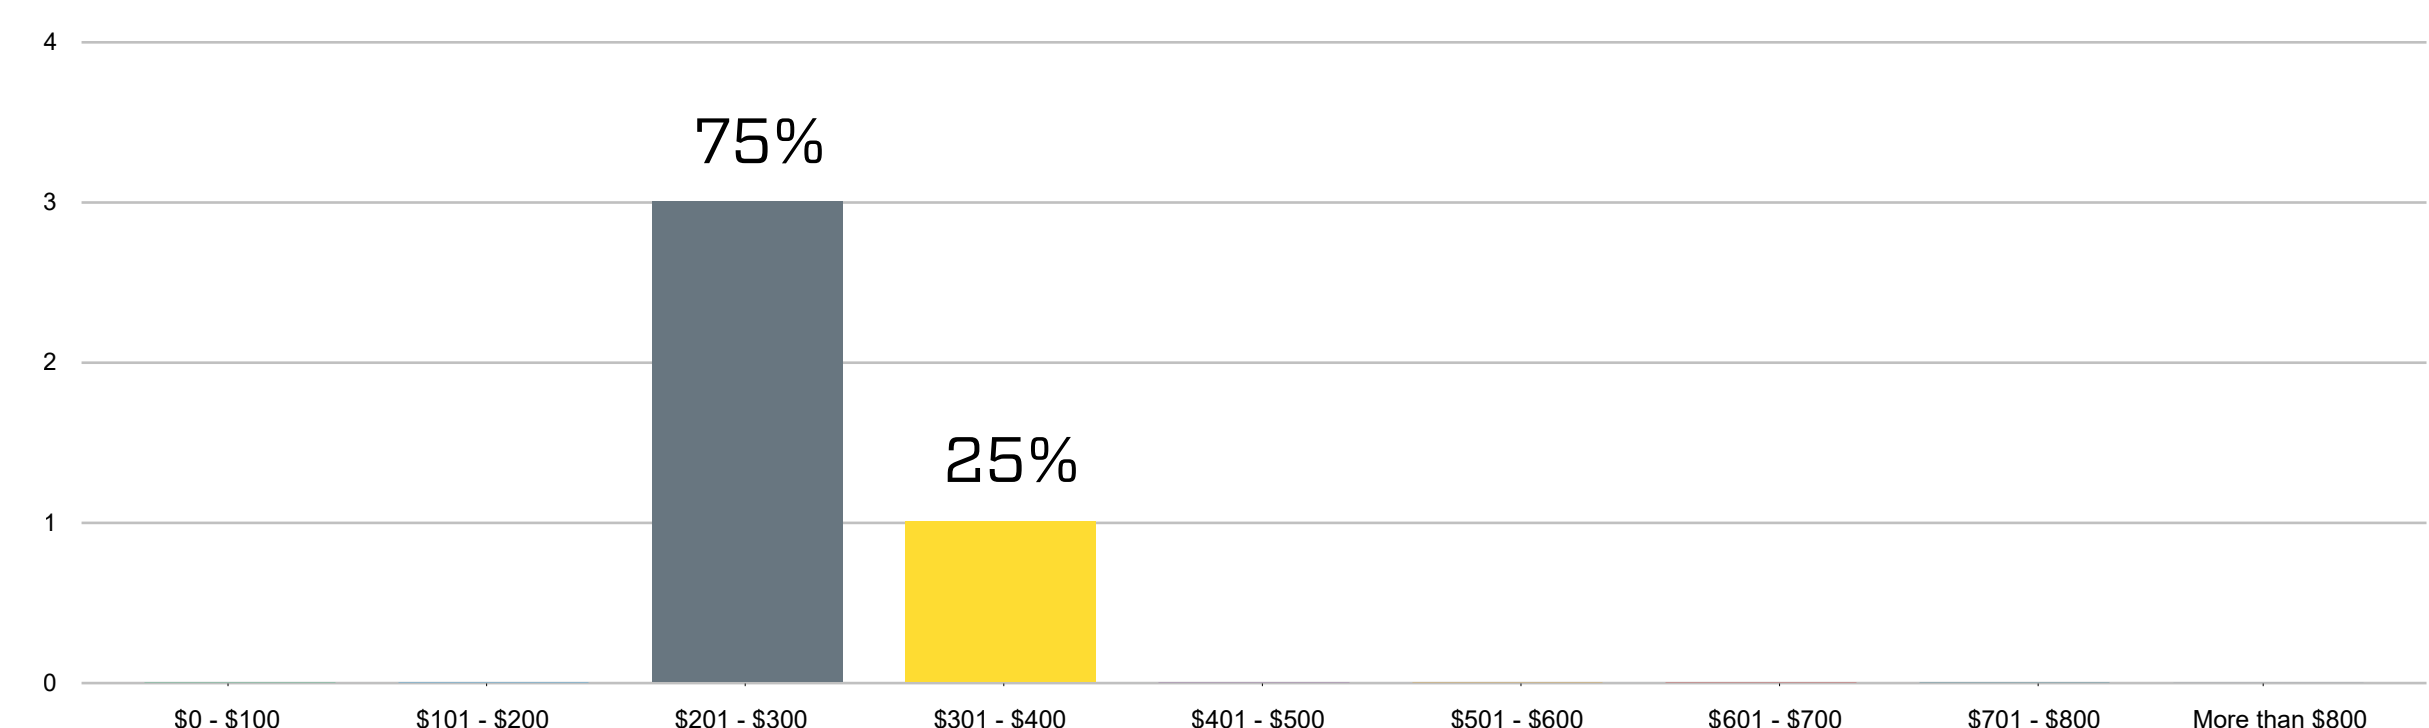

Field of study: Engineering

Field of study: Fine Arts: Graphic, Visual, Performing Arts

Field of study: Health Professions & Related Clinical Sciences

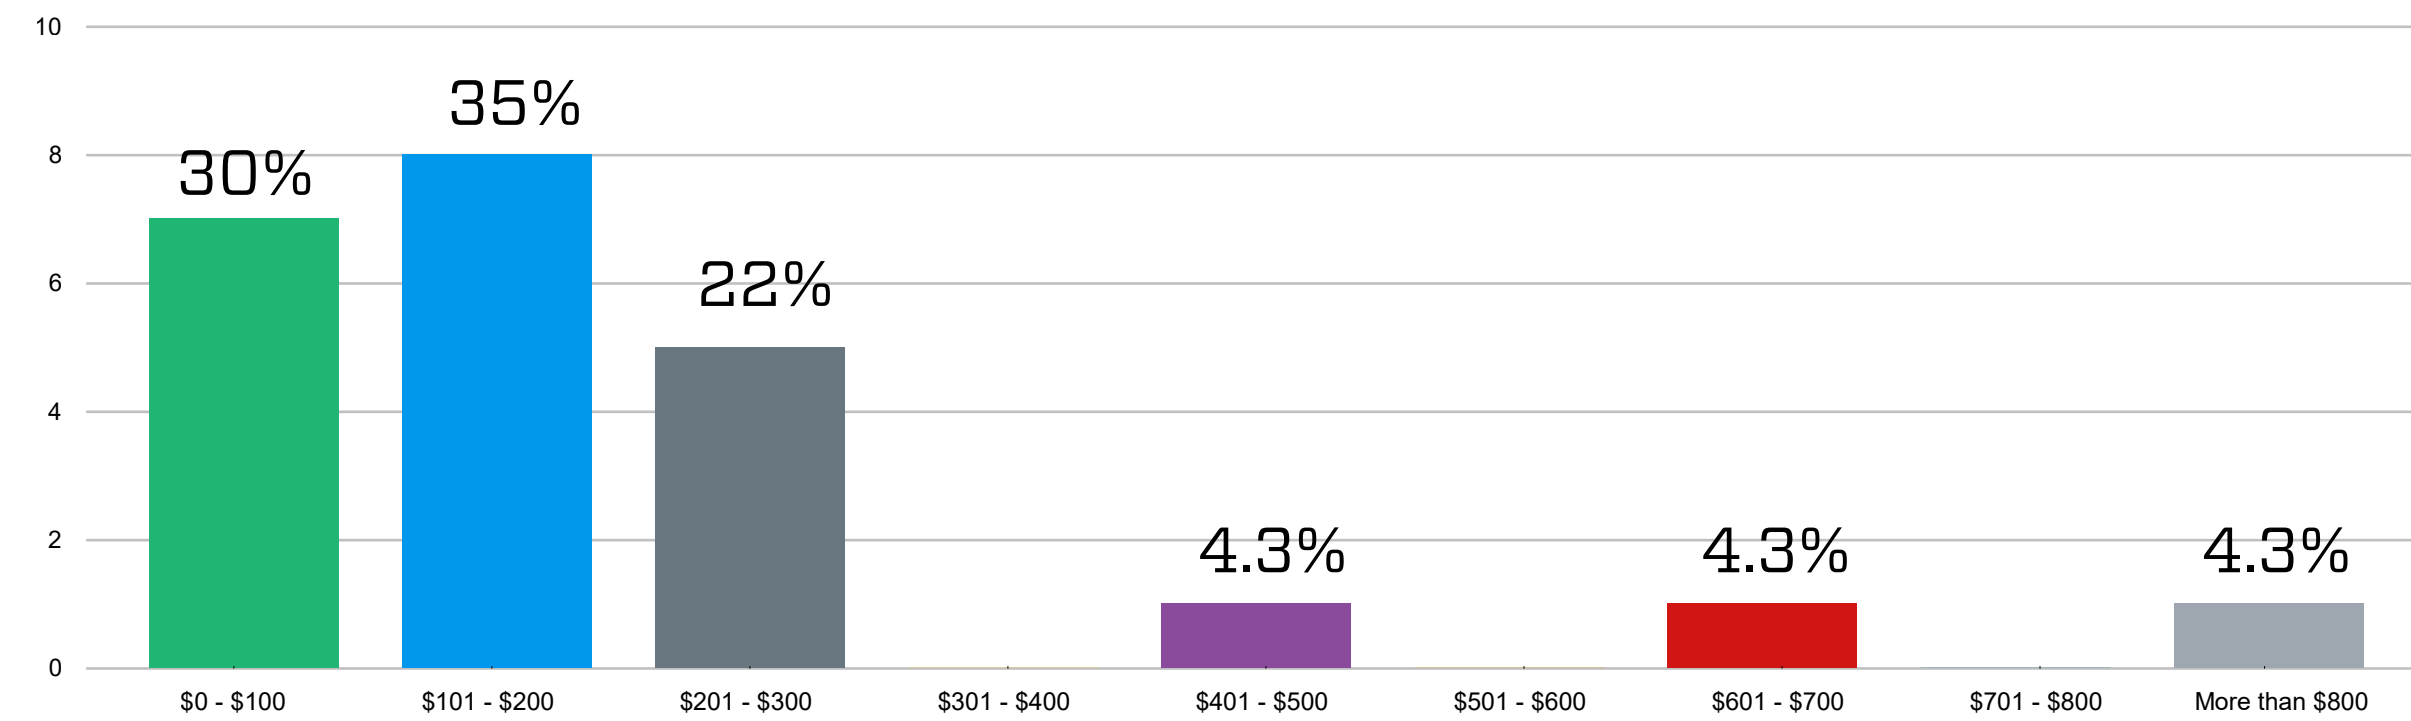

Field of study: Mathematics

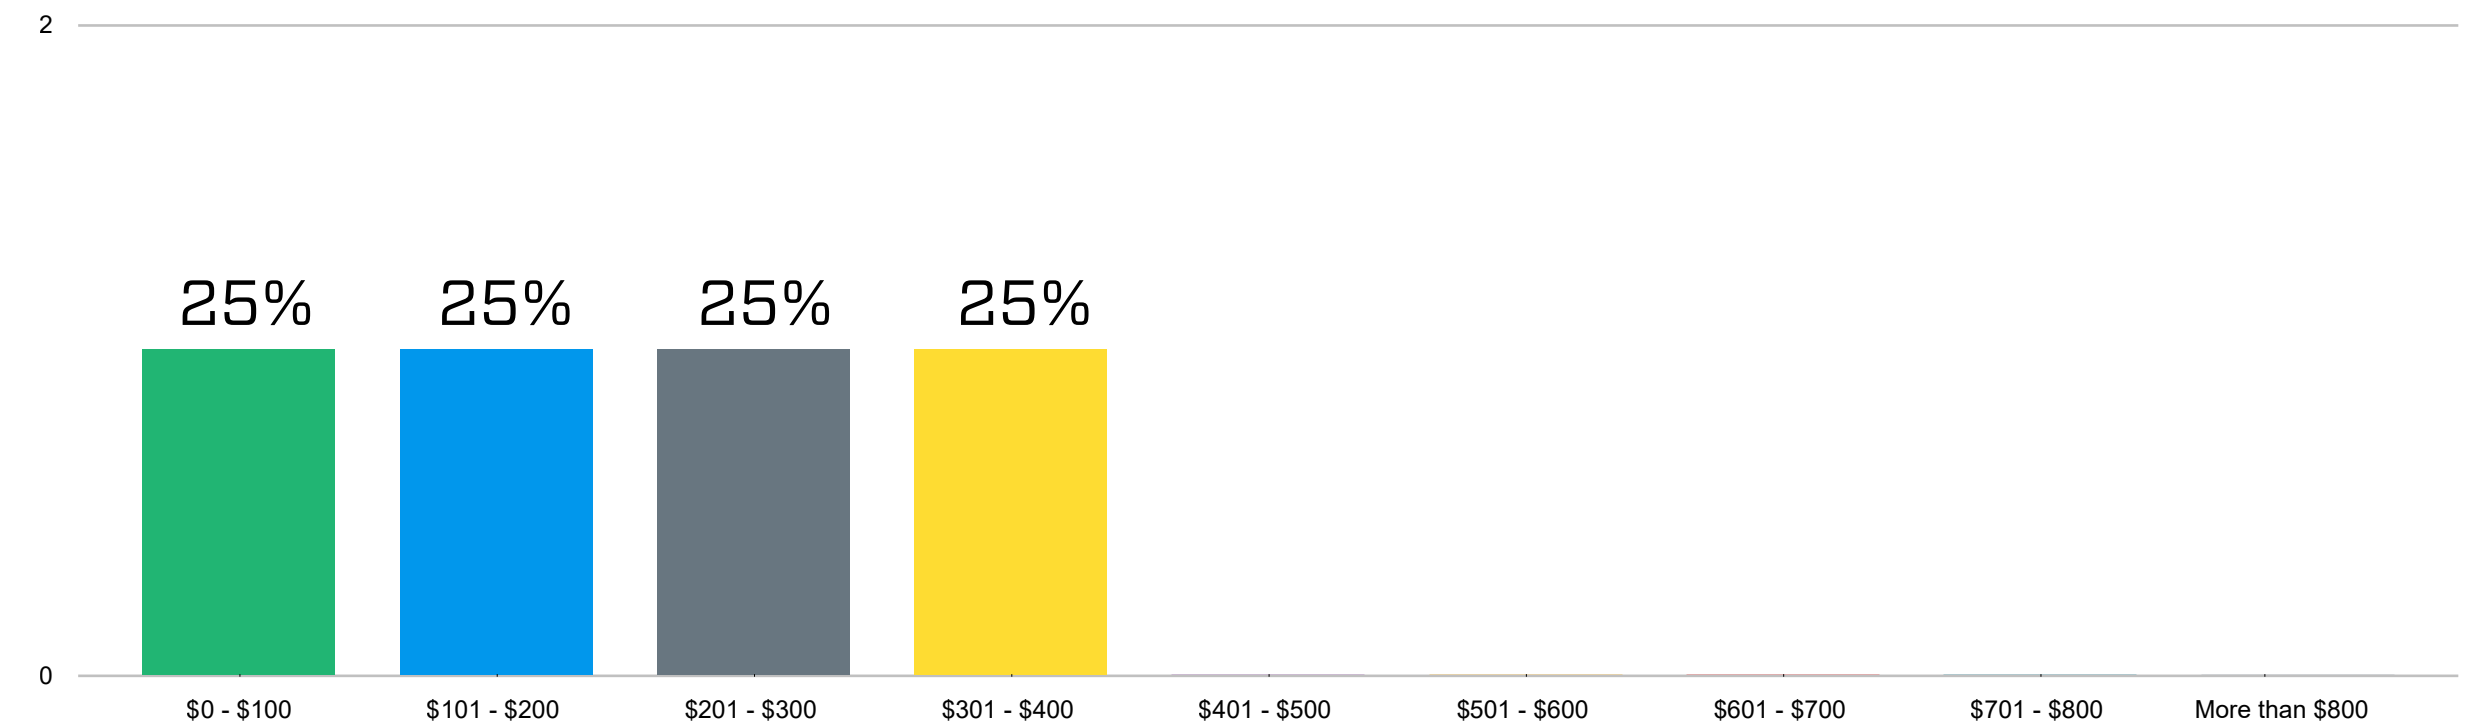

# ANALYSIS BY FIELD OF STUDY

On average, how much do you currently spend on all of your required course materials in a single semester?

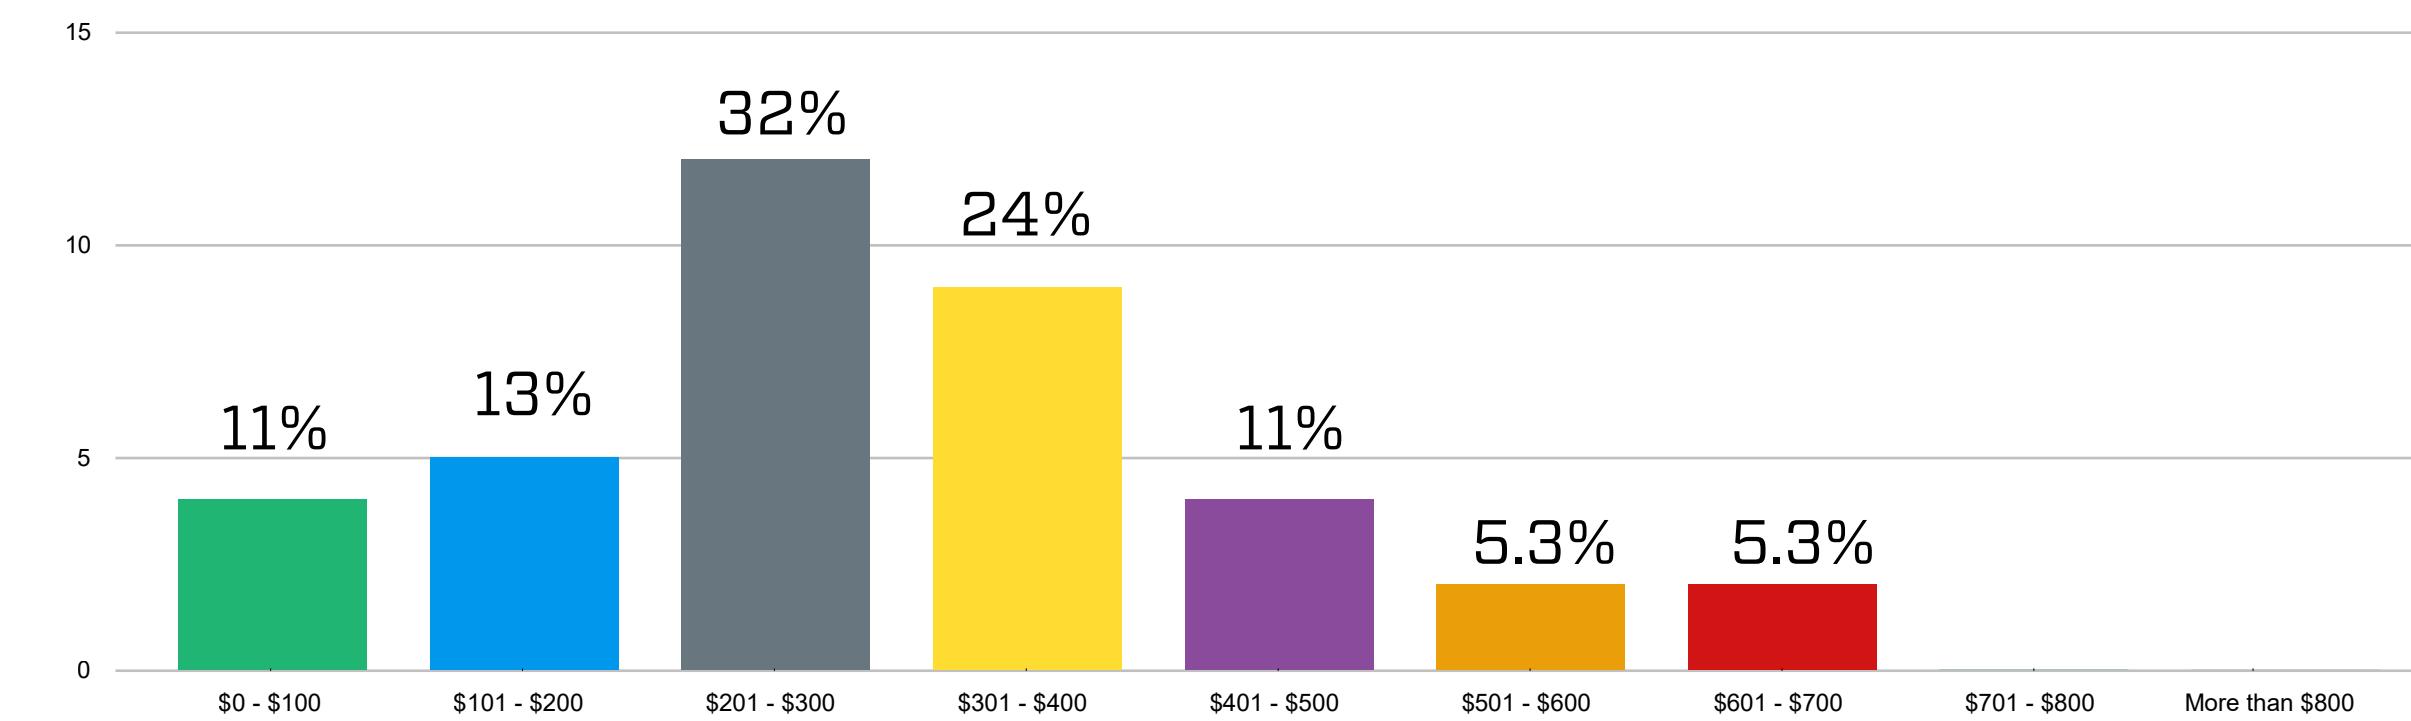

Below are the amounts spent by undergraduate students on required course materials per semester, categorized by field of study.

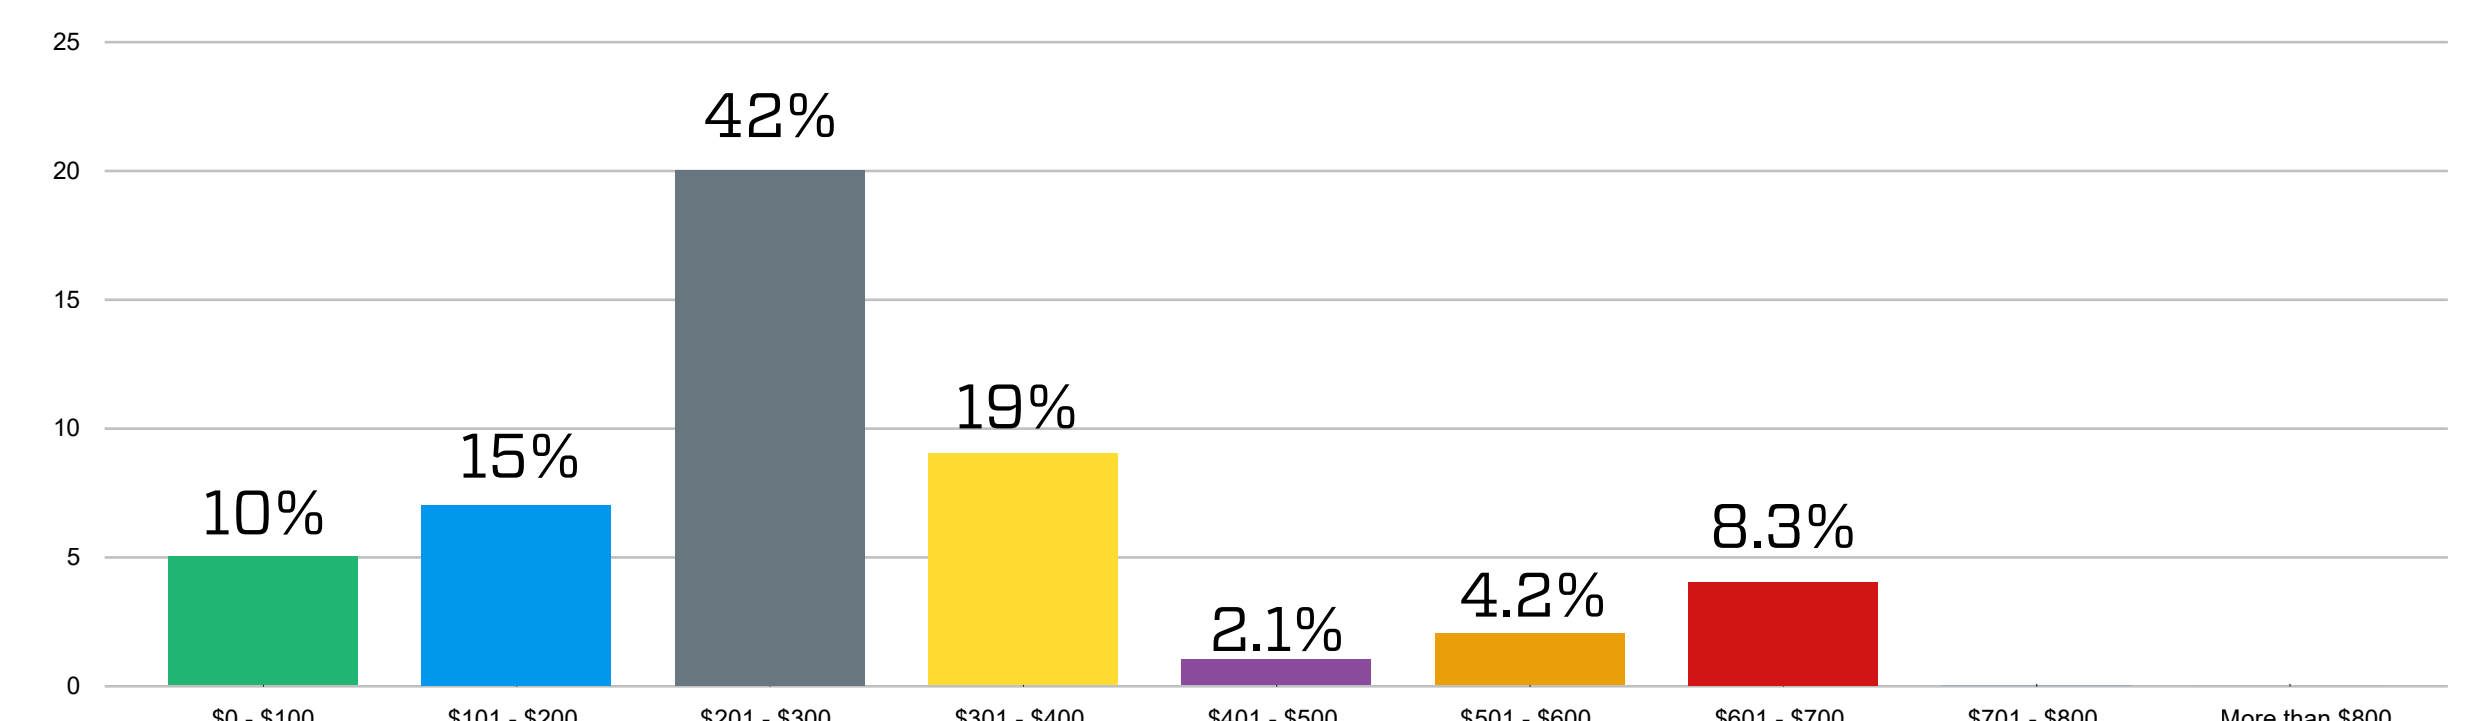

Field of study: Humanities (e.g., History, English, Religion, etc.)

Field of study: Political or Law-Related

Field of study: Physical Sciences (e.g., Biology, Chemistry, Ecology, etc.)

Field of study: Social Science (e.g., Anthropology, Psychology, Sociology, etc.)
